We will give you a **precise picture** of the health of your *messaging infrastructure* as well as the steps to secure it and bring it into the 21st century.

*Do you have persistent problems with **viruses**, **spam** or **phishing**?*

Whether you are undergoing an audit or engaged in defense planning, your messaging infrastructure is an important point of attack.

We can help you uncover your most dangerous areas of vulnerability.

Who are we?

Founded in 2017, Indominus is an IT consulting firm specializing in infrastructure.

Indominus, from the Latin word for *unbeatable*, reflects our culture of redefining what is possible.

Born in the cloud, we are continuously developing tools that allow us to dramatically reduce the cost of IT.

We are a Microsoft Partner and a service provider for Azure and Office 365

Here is what makes us different:

- We're faster and more efficient
- We provide clear indicators
- We create crystal clear roadmaps
- We give step-by-step guidance that makes sense
- We produce a clear set of risks and related costs
- Our pricing is highly competitive
- A *full refund* of the analysis phase for any mandate to optimize Active Directory

We have a single-minded vision: *to ensure that everyone has access to high-quality IT consulting for a reasonable price!*

FIERCE IT CONSULTING

HOW IS YOUR COMPANY
E-MAIL SYSTEM DOING?

What we offer

We offer a high-level analysis of your infrastructure based on a highly condensed 3-day mandate.
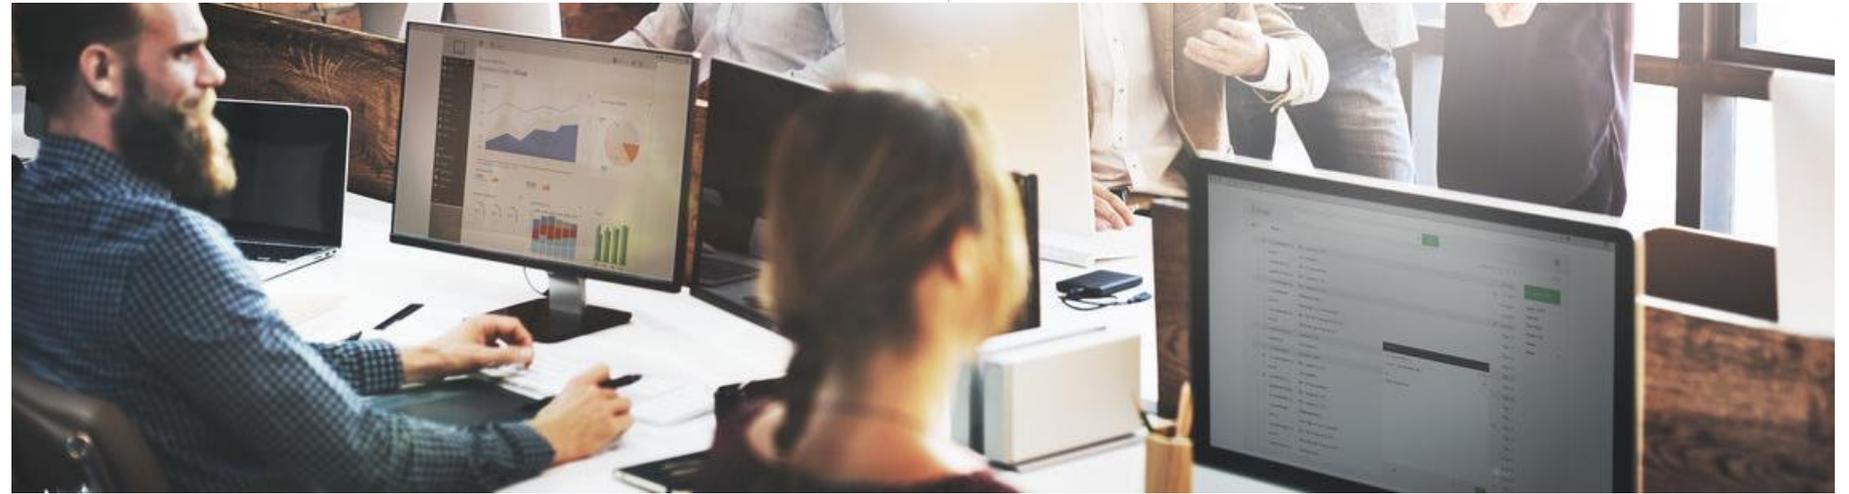

Here is the list of points we will check for you:

- Full list of OS versions along with the vendor's current support policy
- Health of your servers as well as their dependencies (e.g., *Active Directory*)
- Message flow that identifies possible security faults and weaknesses
- System and client configurations
- Cloud migration path
- The quality and backup capacity of your infrastructure
- The load on your current service and its ability to scale
- Assessment of the risk of attack and recovery capacity
- Cost analysis of moving to a cloud-based service like *Exchange Online*
- High-level architecture recommendations

Once this analysis has been completed, you will have the means to optimize and secure the infrastructure that enables your business.

What you will get

- Our architectural recommendations for AD
- A health score for each service
- A mitigation plan
- An analysis of the impact of a possible outage or breach

Exchange

Reserve your spot **today**!

Don't spend any more time waiting to modernize your messaging solutions. Get a full analysis of the state of your infrastructure and take an important step into the 21st century.

Every analysis consists of the following:

- A 3-day mandate, with 1 – 2 days spent on-site
- A full collection of data
- An executive report evaluating your environment
